# ELECTRIC OPERATED SWEEPER TRUCK

The DRS-1000 EV Sweeper is a powerful, battery-operated cleaning machine designed for efficient dust control in large areas. With advanced sweeping technology, strong suction, and an eco-friendly design, it ensures maximum cleaning performance with minimal maintenance.

Water Tank Capacity	900L	Cabin	2 Persons
Dust Tank Capacity	1000L	Control System	Smart Control
Sweeping Width	2000mm	Battery Capacity	36 kWh
Number of Brushes	4	Charging Time	6–8 hours
Drive Motor Power	8 kW	Running Time	8–9 hours
Vacuum Motor Power	8 kW	Safety Features	Alarm, Front & Rear Warning Lights, Radar Safety System
Maximum Sweeping Speed	10 km/h	Charging Cost (Approx.)	₹ 400
Maximum Drive Speed	25 km/h	In-built Jet Pressure Washer	130 bar
Maximum Distance Covered (8 Hours)	80 km	Anti-Smog Water Spray System	Yes
Dumping Height	1 meter	Cleaning Efficiency	24000m <sup>2</sup> /h
Dumping Type	Hydraulic	Litter Picker	Yes

## Efficient & Eco-Friendly Street Cleaning

An Advanced Electric Sweeper Truck DRS-1000EV Designed for Smart Waste Collection, Sustainable Urban Cleanliness, and Maximum Operational Efficiency.

## ELECTRIC OPERATED SWEEPER TRUCK DRS-1000 EV:

The DRS-1000 Electric Operated Sweeper Truck is designed for efficient street and urban cleaning. It operates using electric power, making it an eco-friendly alternative to traditional fuel-powered sweepers. Here's a breakdown of its main functions:

- **Street Sweeping:**

The DRS-1000 EV uses rotating brushes (side brushes and a main brush) to sweep debris, dirt, and leaves from roads, sidewalks, and public spaces. These brushes push the debris toward the truck's central suction system.

- **Debris Collection and Suction:**

The truck is equipped with a powerful suction system that draws the swept debris into a large hopper (storage container). This suction system ensures that even smaller debris and dust particles are collected, leaving the surfaces cleaner.

- **Water Spraying for Dust Control:**

The sweeper is fitted with a water tank and sprays water during operation. This helps suppress dust and ensures that the debris is not scattered back onto the cleaned surface, promoting a dust-free environment.

- **Eco-Friendly Operation:**

Operating on electric power, the DRS-1000 EV produces zero emissions, making it a sustainable choice for urban areas. It reduces air pollution, offering cleaner streets without the environmental impact of traditional diesel-powered sweepers.

- **Efficient Coverage:**

With a large cleaning width (up to 2.3 meters), the truck can clean large areas in a shorter time. It's designed to work efficiently in both wide open spaces and narrower streets, offering flexibility in urban environments.

- **High Cleaning Capacity:**

The DRS-1000 EV can clean up to Large area per hour, making it suitable for large-scale urban cleaning operations.

## Advanced Features Powerful Performance.

From precision brushing to high-power vacuuming – every detail of DRS-1000 EV is built for next-level street cleaning.

**High Pressure Water Gun**

**Anti-Smog System**

**Side Brush and Vacuum Cleaner**

**Durable Rubber Tyres**

**Strong Vacuum Cleaner**

**High Density Edge Brush**

# The Ultimate Sweeping Solution for Cleaner Cities & Industries

The DRS-1000 EV battery-operated sweeper is designed for heavy-duty cleaning in various public and industrial spaces. It ensures efficient dust and debris removal, making it ideal for:

**Roads & Highways**

**Airports**

**Parking Lots**

**Industrial Areas**

**Commercial Complexes**
