# ELECTRIC OPERATED SWEEPER TRUCK

The DTMS-7500 EV Sweeper is a powerful, battery-operated cleaning machine designed for efficient dust control in large areas. With advanced sweeping technology, strong suction, and an eco-friendly design, it ensures maximum cleaning performance with minimal maintenance.

Clear Water Tank	1500L	Litter Picker	Yes
Waste Dust Tank	7800L	Operator Cabin	2 Persons+AC
Sweeping Width	3500mm	Runing Time	8-12 Hr
Max. Cleaning Efficiency	45000m2/h	Charging Time	6-8 Hr
In-Built Jet Pressure Washer	150Bar	Drive Motor Power	250 Kw
Anti-Smog Water Spray System	Yes	Maximum Drive Speed	75 km/h
Number of brushes	04	Maximum Distance Cover	80 km
Dumping Type	Hydraulic	Maximum Sweeping Speed	10Kw/h
Changing Cost(approx)	₹ 1500 rupess	Dumping Height	1.2 Meter
Chassis Capacity	9.3 TON	Battery Capacity	230 kWh
In Build Ai Integration	Yes	In Build 360 Camera	Yes
Control System	Smart Touch	Vacuum Motor Power	24 Kw

# ELECTRIC OPERATED SWEEPER TRUCK DTMS-7500 EV:

The DTMS-7500 Electric Operated Sweeper Truck is designed for efficient street and urban cleaning. It operates using electric power, making it an eco-friendly alternative to traditional fuel-powered sweepers. Here's a breakdown of its main functions:

- **Street Sweeping:**

The DTMS-7500 EV uses rotating brushes (side brushes and a main brush) to sweep debris, dirt, and leaves from roads, sidewalks, and public spaces. These brushes push the debris toward the truck's central suction system.

- **Debris Collection and Suction:**

The truck is equipped with a powerful suction system that draws the swept debris into a large hopper (storage container). This suction system ensures that even smaller debris and dust particles are collected, leaving the surfaces cleaner.

- **Water Spraying for Dust Control:**

The sweeper is fitted with a water tank and sprays water during operation. This helps suppress dust and ensures that the debris is not scattered back onto the cleaned surface, promoting a dust-free environment.

- **Eco-Friendly Operation:**

Operating on electric power, the DTMS-7500 EV produces zero emissions, making it a sustainable choice for urban areas. It reduces air pollution, offering cleaner streets without the environmental impact of traditional diesel-powered sweepers.

- **Efficient Coverage:**

With a large cleaning width (up to 3 meters), the truck can clean large areas in a shorter time. It's designed to work efficiently in both wide open spaces and narrower streets, offering flexibility in urban environments.

- **High Cleaning Capacity:**

The DTMS-7500 EV can clean up to Large area per hour, making it suitable for large-scale urban cleaning operations.

## Advanced Features Powerful Performance.

From precision brushing to high-power vacuuming – every detail of DTMS-7500 EV is built for next-level street cleaning.

# The Ultimate Sweeping Solution for Cleaner Cities & Industries

The DTMS-7500 EV battery-operated sweeper is designed for heavy-duty cleaning in various public and industrial spaces. It ensures efficient dust and debris removal, making it ideal for:

**Roads & Highways**

**Airports**

**Parking Lots**

**Industrial Areas**

**Commercial Complexes**
